SUPERFUND

MEMORANDUM

~~CONFIDENTIAL~~

DCN: TZ4-C10021-EP-11225

DATE: July 27, 1992

TO: Dave Bennett

FROM: Lynn Guilford

SUBJECT: HRS for Safco Environmental, Post Falls, Idaho
EPA No. 68-W9-0008, SAIC/TSC Project No. 6-788-03-1400-350

The Safco Post Falls site is a piece of property where there is no documentation that hazardous wastes have ever existed or been disposed. The only contamination was from a pit and an underground storage tank, both containing only petroleum products. Safco Environmental is a company that operates as a transporter collecting containerized hazardous and non-hazardous wastes generated by small businesses such as automotive shops or paint businesses. There is no documentation that they ever operated on-site. This site is not currently being scored using the HRS, since there is no known hazardous waste associated with the site. If documentation is later found documenting hazardous wastes an HRS score will be prepared.

Please feel free to call Kathryn Gladden or myself at 206/485-2818 if you have any questions or comments regarding this memorandum.
